

Pairing with Windows 8/Windows 10 PC

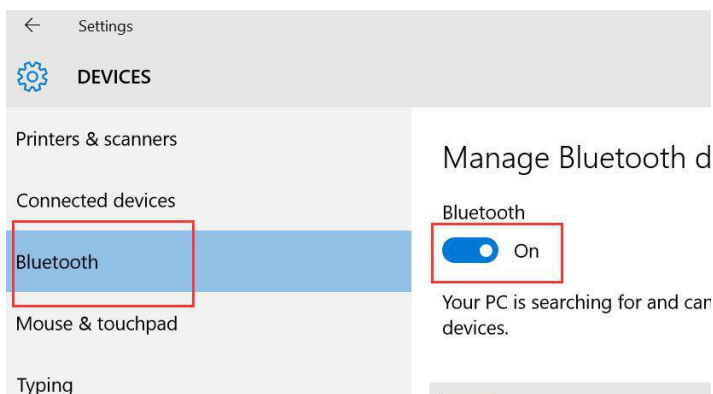

1. Go to "Start" >"Settings."

2. Go to "Devices."

3. Click "Bluetooth" and turn on Bluetooth. It will start searching for devices.

Note:

If there is no “Bluetooth” option in the “Devices” menu, it means your computer doesn’t have Bluetooth. Please insert a USB Bluetooth Dongle and then repeat Step 3.

4. Click the device that starts with “LVS-” (or “Other”) and then click “Pair.”

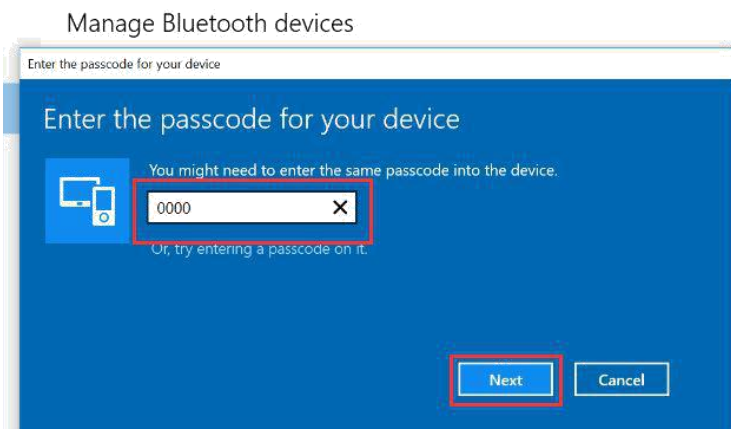

Bluetooth

Your PC is searching for and can be discovered by Bluetooth devices.

5. Enter the device’s pairing code, which is 0000. Click “Next.” (Skip this step if you don’t see this pop-up).

6. Now your toy should be paired to your computer.

7. Open and log into the Lovense Remote app.

8. Click the  icon.

9. Tap "+" to begin searching. After toy is found, tap "Done". The light will stay on to indicate it's connected. Your toy can now be controlled with your PC.

NOTE:

Since our toy has two built-in Bluetooth modules, you may see two devices found during pairing, but they are the same toy.

1. If there are two devices with same icon and same name, try one of them first. If it can't pair with your computer, try the other one.

2. If there are two devices with different icons and same name, try the one that has the earphone icon first.
